Gunnar Nicholson Honored By Award from Sweden

Gunnar Nicholson, president of Tennessee Pulp & Paper Co., the new mill in the South sponsored by a group of box manufacturers, has been honored by receiving from the King of Sweden the title of Commander of the Order of the Vasa. A formal presentation occurred in New York on Oct. 26, with Swedish Consul General Kronwall acting for the King. Mr. Nicholson, born in Sweden, moved to Canada as a young man where he en-

tered the pulp and paper industry and he was prominently identified with many major developments in Canada and Southern United States. For many years he was with Union Bag & Paper Corp., as manager of the big mill in Savannah, Georgia, and later was vice president and executive vice president of that company. He resigned a few years ago to devote his full attention to the Tennessee project. The Order of the Vasa is presented by the King in recognition of outstanding services.

Building New Straw Pulp Mill Near Larissa, Greece

Athens . . . The Parsons & Whittemore/Lyddon Organization, New York, London and Paris, has contracted to build a new straw pulp mill of 12,000 annual tons capacity near Larissa, Greece. It will be completed in two years at cost of \$5,700,000. Later a paper mill of similar capacity will be built at the same site. Black-Clawson equipment, principally built at Newport, England, will be used.
